

Drawing Your Own Mandala

Begin by drawing your circle with pencils or markers on a piece of paper. As you draw, think of what you would wish. World peace? To end hunger? To save the forests? Next, draw a picture in the center of the circle that shows how the world will look when your wish comes true. Make a series of squares around this center picture, drawing gateways on all four sides of each square. This forms the maze that will lead to your perfect world. Throughout your design, add animals, flowers and other symbols that are important to you.
