

# World Religions

## Introductory Project

### What Does Religion Mean To You?

Based on your experiences, perceptions, and ideas, write a brief definition of religion. After you have formulated your definition, create a collage that incorporates and displays your definition. You may assemble your collage using anything you like: images and/or text that you cut from magazines or print from the Internet, or images that you draw, paint, or photograph yourself, are all acceptable. You may want to use a standard poster board for your collage, though you are not limited to that. Be as creative as you would like! You will be expected to present your definition and collage to the class and explain your work. We will display your collage in the classroom so that it might inspire us (and others)!

The grade on your project will reflect the thoughtfulness of your definition, the quality of your collage, and your presentation of both to the class!
