**The final job mambo**

Part-time jobs mambo, pg. 12

not be as smart as you once were. Easy as pie.

The last thing to keep in mind is that, if your resume is not eye-catching, it might not even get read. To protect yourself from this possibility, make sure to throw in something that immediately grabs the attention of whoever is looking at it. Some interesting ideas include:

- Writing your resume on human skin.
- Wiring your resume to burst into flames as soon as it is opened.
- Starting it out by writing, “WE HAVE YOUR CHILDREN! Now that I have your attention...”
- Packaging lingerie with your resume.
- Packaging a dead possum with your resume.
- Packaging a live wolverine with your resume.
- Including a photo of yourself with an incredibly wide, innocent smile on your face.
- Hiding under the desk of the person who will be doing the hiring, and jumping out with your resume in hand when they come in.
- Tying your resume to a rock and throwing it through a window of the place you’re seeking employment.
- Sending in a tape of yourself singing your resume to the tune of any Billy Joel song.
- Keying your resume into the hood of the car of the owner of the company that you seek to become employed at.
- Steak through the place you want to work with your resume painted on your naked body.

Be creative. Remember that the object is to catch the reader’s attention. If your future employer likes what he sees, you may be called back for an interview. This is probably the most vital part of the job-acquiring process, because the decision of whether or not you will be hired will be based on how you come across at the interview. Just like writing your resume, you must come across as impressive, but not so impressive that your employer feels his position is threatened. And most importantly, you must once again stand out and above any dope. Therefore, I recommend wearing things that are flashy, especially if they violently clash with each other. Ideally, you want to create such a harsh image that your interviewer will not even be able to look at you. This will give you that necessary edge in the interview. Other eye-catching ideas for things to wear include clown suits, dominatrix outfits, super-hero-style tights, poorly cured animal hides, aluminum foil, and anything actually on fire.

Next, however, comes the most important part of the interview: the introduction. The first words out of your mouth must immediately impress your interviewer. You must come across as dynamic and friendly to make a good impression on your interviewer lest they think you are some kind of freaky, anti-social psychopath. Here are some examples of good and bad greetings:

**Bad:** Hello.

**Good:** Oh my God! You are the most attractive human being I have ever seen.

**Bad:** Good morning.

**Good:** Aaaaaaaaaaahhh! I’m sorry. I just have so much good will and love for humanity that it sometimes just bursts out like that.

**Bad:** Nice to meet you.

**Good:** Whaaaaaaaaaaat aaaaap!

That’s it. That’s all you possibly need to get an amazing job and have a perfect life forever. Plus, I’m out of space. Bye!
